Subject: Question regarding the Small Entity Compliance Guide for OOOOa

Ms. Thompson or Ms. Hambrick,

I am conducting a review of the "Small Entity Compliance Guide for Oil and Natural Gas Sector: Emission Standards for New, Reconstructed, and Modified Sources, 40 CFR Part 60, Subpart OOOOa" in anticipation of a compliance project for a client, and noticed that in Section 8.3, titled "When must I comply?" on page 43, it says that:

"For storage vessels located at well sites, August 2, 2016 or within 60 days, whichever is later, if there are no other **wells** present at the wellsite, or..." (emphasis mine)

"August 2, 2016 or immediately upon startup, whichever is later, if there are other **wells** present at the wellsite." (emphasis mine)

Two paragraphs later and on the following diagrams, this is stated as "storage vessels" rather than the bolded "wells." It seems the use of the word "wells" here is a typo. Is the determining factor for initial compliance demonstration of storage vessels at well sites that there are other storage vessels present? Or that there are other wells present?

Respectfully,
Branden
